HD+ LED monitor

Clearer, sharper images in full high-definition color. Acer monitors brings users into a perfect colorful world in HD+ 1600x900.

Flickerless

Flickerless

The flicker screen is barely visible, but strains eyes and even damages the health of your eyes, especially for heavy monitor users, like programmers, writers, students or graphic designers. Acer Flicker-less monitors can eliminate annoying screen flicker, and provide a comfortable viewing experience.

BlueLightShield

Acer BlueLightShield reduces the exposure ratio of blue light, which can potentially cause long-term eye damage, by adjusting color hue and brightness.

ComfyView

ComfyView™ technology

Acer ComfyView™ technology incorporates several features that take into consideration prolonged usage by heavy users such as programmers, writers, and graphic designers to reduce eye strain and provides a more comfortable viewing experience.
